Good Golfers. Better People.
What Our Teens & Alumni Say About The First Tee

A Lasting Impact: The First Tee’s Role in Fostering Positive Youth Development
Springfield College Center for Youth Development & Research, 2015

Empowering Youth Over Time

- **Better Citizens**
  - **91%** ALUMNI engaged while in The First Tee
  - **72%** ALUMNI still engaged in service

- **Community Service**
  - Compared to 22% of youth aged 16-24 who engage in community service.

- **Lifelong Golfers**
  - **83%** TEENS 90% ALUMNI improved golf skills
  - Percentage of teens and alumni who consider themselves lifelong golfers.

- **Lifelong Golfers**
  - **96%** TEENS 90% ALUMNI
  - Teens who credit The First Tee for improving their golf skills.

- **Better Students**
  - **84%** TEENS 85% ALUMNI
  - Teens and alumni who credit The First Tee for helping them be a better student.

- **Prepared for Life**
  - Both teens and alumni reported they developed and applied more life skills the longer they stayed in the program. Life skills included interpersonal skills, managing emotions, goal-setting and resilience.

The Power of Mentors

- **Empathy**
- **High Positive Expectations**
- **Advocacy**

- **Improved Mentor Relationship**
  - **84%** TEENS 87% ALUMNI
  - Both teens and alumni said their relationship with their coaches were meaningful and grew stronger over time. These relationships were based on empathy, high positive expectations and advocacy (open doors and eyes to new experiences).

Behind the Study

**A Lasting Impact: The First Tee’s Role in Fostering Positive Youth Development**

**WHY?**

Evaluating programs is at the heart of a healthy nonprofit organization. The results of this survey are consistent with, and provide additional support to, the findings of previous longitudinal, evidence-based research conducted on The First Tee programs. Through this research, The First Tee has gone a step further and examined the depth of participant/coach relationships respective to the acquisition of life skills associated with positive youth development, something few organizations have done.

**Central themes emerging from the study:**

1. Other research has shown that positive youth development programs that lack fidelity in delivery can do more harm than good. Data from The First Tee’s recent study supports that coaches at the chapters are effectively using, as intended, four “Building Blocks” (Activity-based, Mastery-driven, Empowering Youth and Continuous Learning) when delivering the program. These results also support the importance of a non-family adult mentor, such as a coach, in the lives of youth. The participant/coach relationships established within The First Tee Life Skills Experience are meaningful and deep from the participants’ and alumni perspectives.

2. Additionally, a recent GradNation report released by America’s Promise Alliance noted that while having a caring relationship with a non-family adult is important, it alone may not result in positive youth development outcomes. Relationships are most effective when they serve as an anchoring function where the adult provides a gateway to a larger web of peer and adult support, as well as a variety of new experiences. Data suggests The First Tee coaches may provide this anchoring function through their relationships with participants.

3. As participants progress through The First Tee Life Skills Experience they reported the quality of their relationships with coaches increased. Coaches play a critical role in how participants define their experience. The key message learned from these participants and alumni is that coaching for positive youth development is not done to youth, rather, it is founded on relationships that are built with youth. This message is at the heart of The First Tee.

---

*The First Tee is a great experience. It’s definitely going to help you later in life when you’re trying to make a hard decision or in a situation when you don’t know what to do.*
